Work experience

Unity developer – Denda Games

February 2024 – July 2024 as Intern

August 2024 – January 2025 as Part time unity developer

- Developed the core mechanics for “Games Advent Calendar 2024”, including a general hub world and a modular system for integrating minigames. Additionally, fully developed multiple minigames featuring completely different gameplay styles.
- Assisted in porting “Games Advent Calendar 2024” from PC to Nintendo Switch. This included optimizing all aspects of the game to meet the technical requirements of the Nintendo Switch.
- As a part-timer, helped port “Dan the Man” from an “Halfbrick” in-house engine (main language is C++) to Defold (main language is Lua)

Technical skills

C# - Advanced

C++ - Intermediate

HTML/CSS - Intermediate

Godot – Intermediate

Unreal Engine 5 - Intermediate

Soft skills

Teamwork

Project delivery

Languages

Russian(C2)

English(C1)

Latvian(B2)

Network programmer in Unity – Omni-U

February 2025 – July 2025 as Intern

September 2025 – October 2025 as part time Unity gameplay developer

- Created a low-level local multiplayer system on top of the “Unity Transport” package. The implemented functionality included custom classes for packet wrapping and dispatching across the network, message fragmentation, and data compression.
- As the only programmer on this project, was responsible for developing all technical aspects of both the front-end and back-end of the game. This included UI scripting, save/load systems, and general gameplay scripting.

Education

Saxion University of Applied Science

Creative Media and Game Technologies 2021 – 2025

Achievements

- The Toad’s Descent: Lost Culture was designed and made for festival and became the jury choice to be presented at the local “The Overkill” festival
- Tutoring and being a team leader for “Baltic Center for Educational and Academic Development”. Working with foreign students. Recommendation letter available upon request.
